

## Windows 8 Installation Guide (Clean installation)

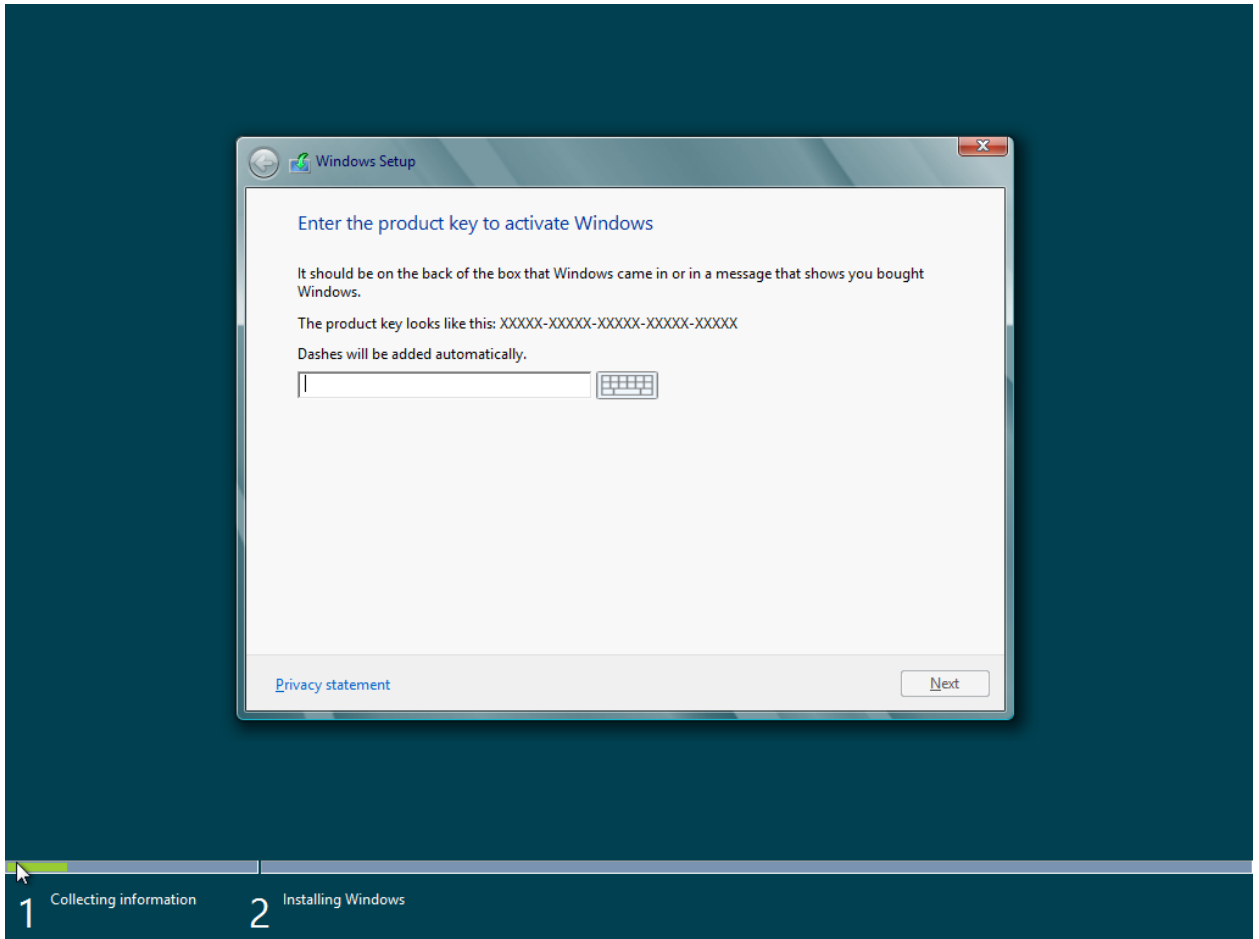

1. Place the Windows 8 upgrade disk into your optical drive and restart the system.
2. Once the system restarts, you will see a prompt asking you to “press any key to boot from disk”. Press any key on your keyboard and the Windows 8 disk will load.
3. After the disk finishes loading, you will see the following screen:

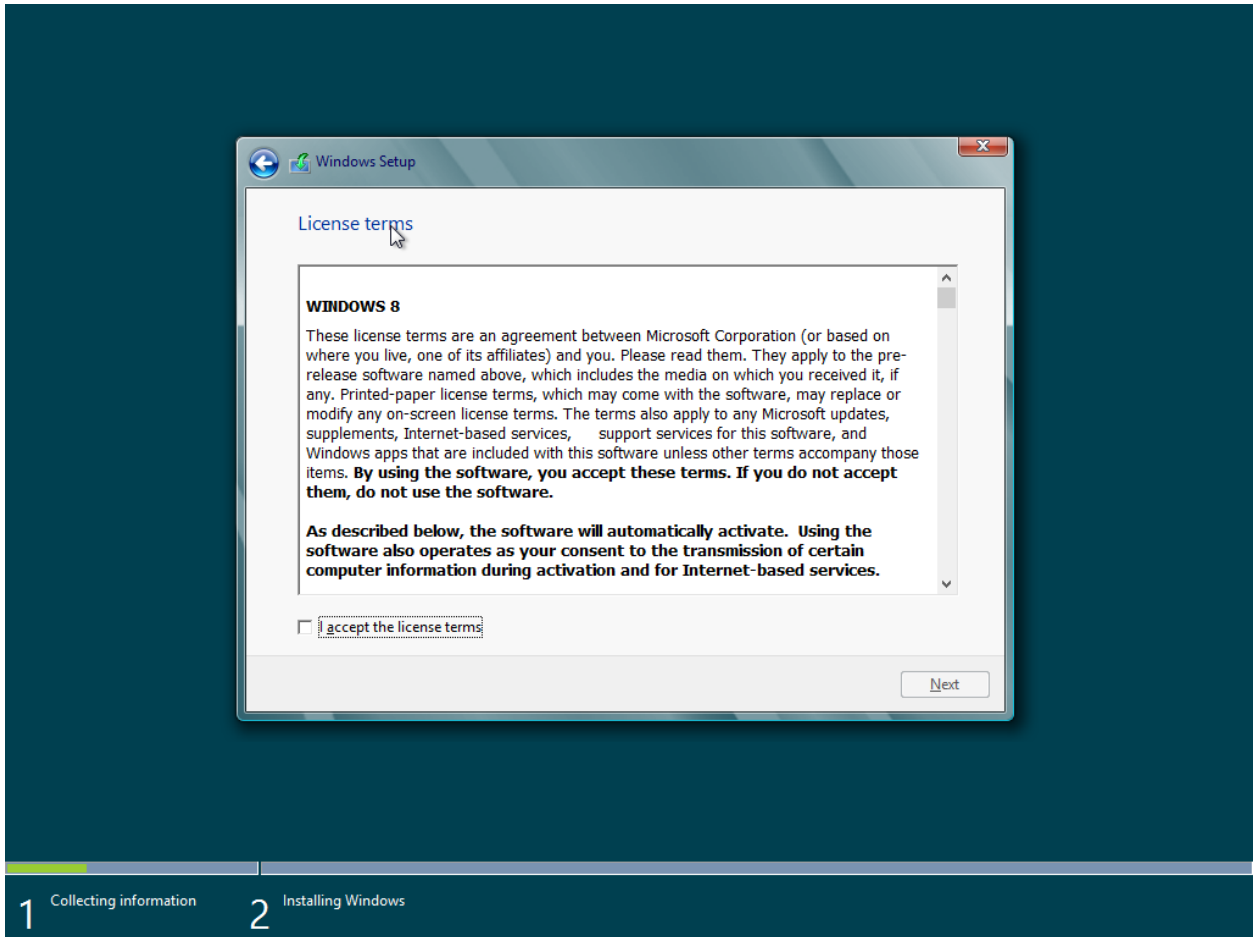

Click **Next** to continue.

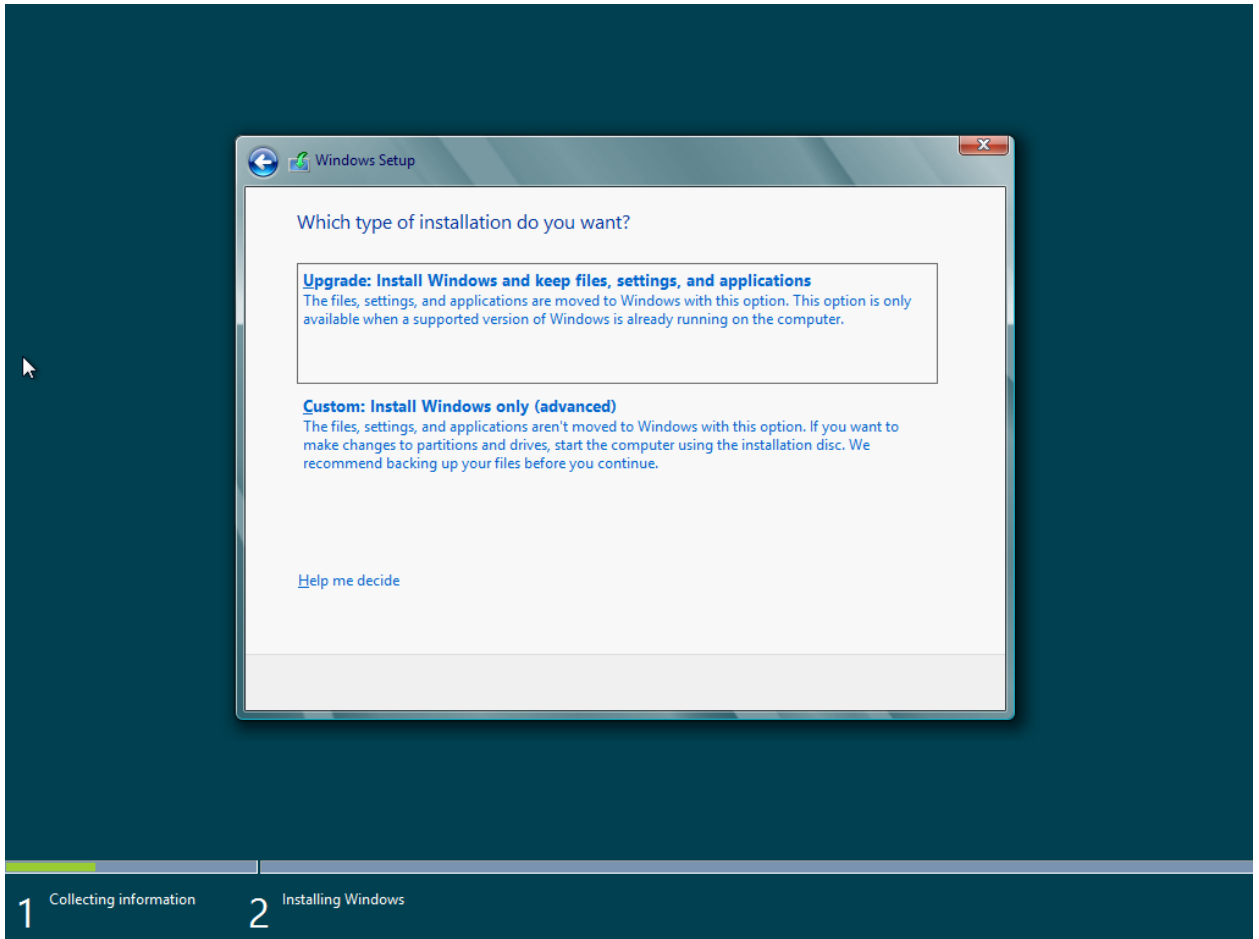

4. Click **Install** now.

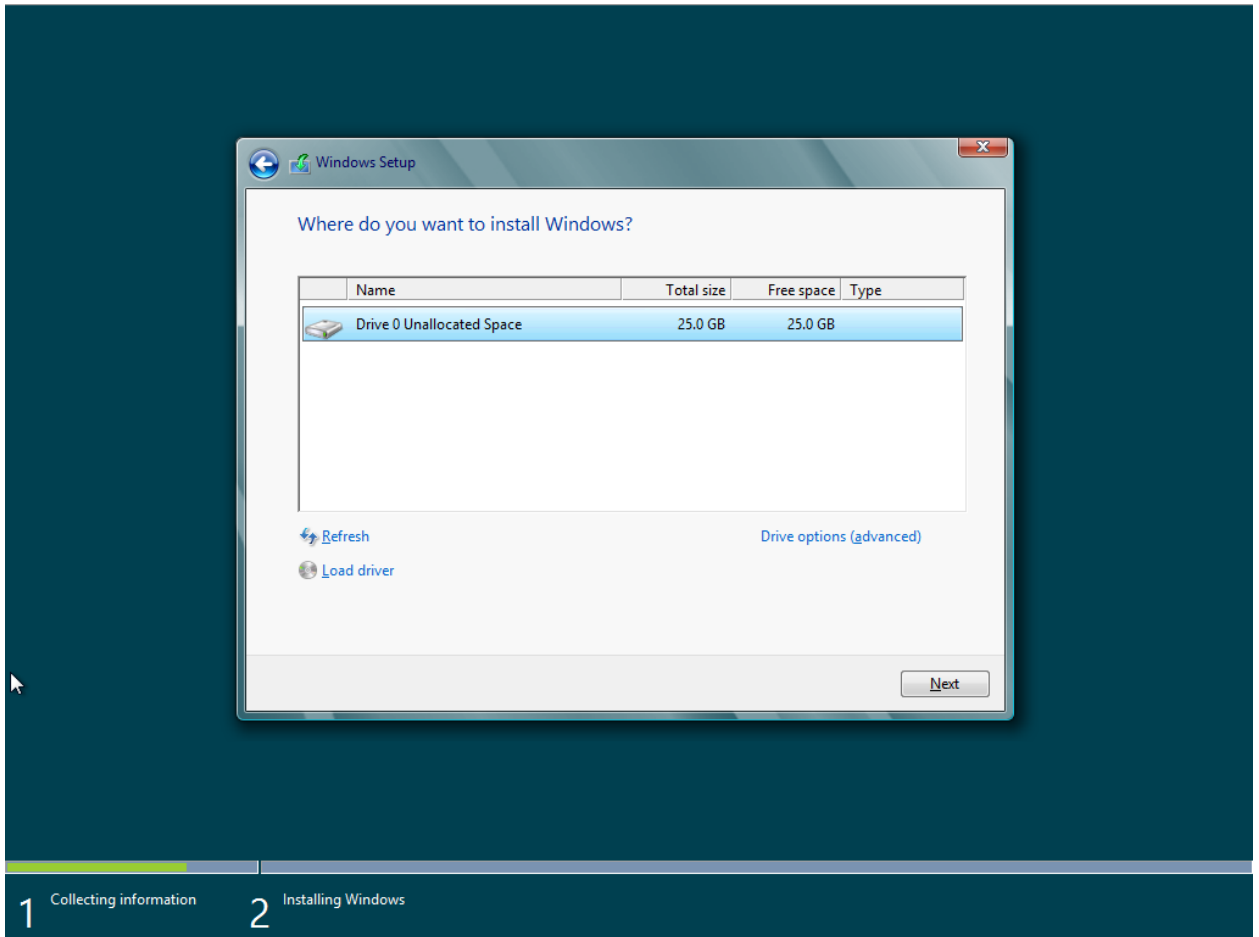

5. Enter your product key and then click **Next**.

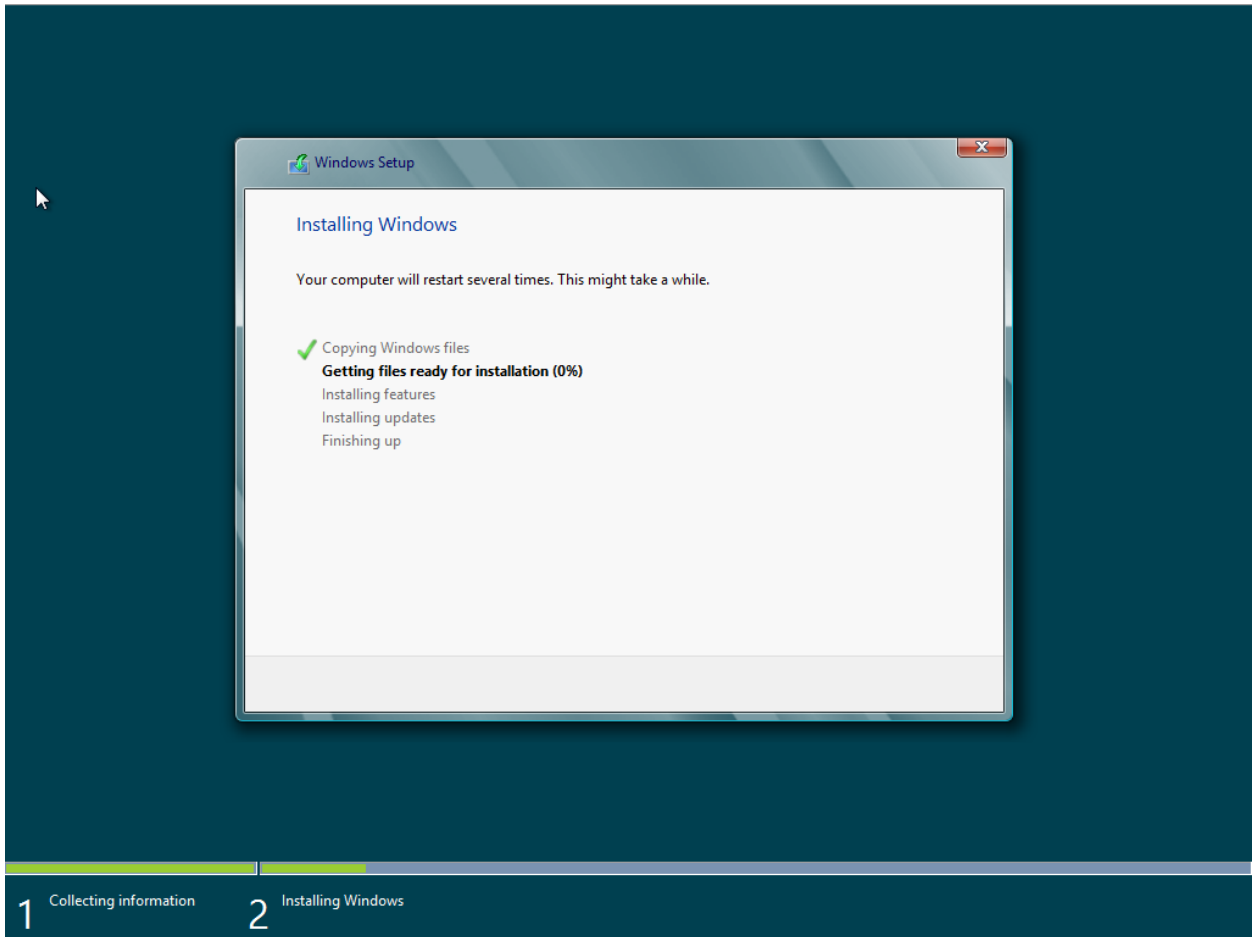

6. You must accept the License terms in order to install. Place a check next to **I accept the license terms** and then click **Next**.

7. Choose **Custom** for a clean installation.

8. From here, highlight your existing hard drive and click **Next**.

9. The installation process will start at this point, and installation should take approximately 25-30 minutes. Your computer may restart several times during the process.
